11/28/16

The model (using 2000 articles) returned the following topics categories, which I manually named. Most topics were generally discernable with the exception of the "News" and "Crime" topics.

Most articles were correctly categorized, with most falling under business-related articles. This was due to a high number of Black Friday-related articles that relayed sales figures of different retail chains.

	Business	Technology	News	Politics	Crime	Personal Finance	Health Insurance	Finance	Markets	Real Estate
1	business	will	going	president	read	can	people	billion	percent	home
2	will	apple	think	will	news	financial	health	percent	rate	new
3	sales	company	like	read	information	percent	percent	stock	rates	according
4	new	new	just	obama	statement	retirement	tax	investors	market	water
5	company	companies	get	state	two	money	year	share	year	read
6	read	read	one	house	told	years	costs	year	growth	year
7	also	technology	thats	bill	car	credit	insurance	company	fed	city
8	businesses	million	now	law	reported	may	plans	capital	last	california
9	small	service	can	former	reports	workers	will	shares	interest	prices
10	products	time	people	states	tweet	pay	read	earnings	since	york
